To Whom it May Concern:

**EXHIBIT 12**

After being notified via mail about this proposed "communications facility", I reviewed the proposal for the new cell tower at 84 Snow Rd. After completing my review, I would like to recommend that this project be 100% unequivocally rejected for numerous reasons, but mainly for public health concerns.

I have lived in Grafton most of my life, and now have 2 small children. The 2 roads that will be affected the most by this "wireless communications facility" will be Greany Dr and Tracy Ann Dr and both of these beautiful neighborhoods have numerous families, many with small children. It is no secret the risk these towers bring to the public, especially when placed ridiculously close to the general public. All it takes is some quick researching to find the dangerous health risks these structures can and will emit to the surrounding areas- mainly radiation exposure. Studies show that cancer rates more than **\*\*TRIPLED\*\*** when living within 1000 feet of these "communications facility". I'm sure our friends at Crown Castle will have some new data for us contradicting this.

I applaud my fellow neighbor at 27 Greany Dr for already speaking out, and I second all of his points - property values, MORE ambient noise (did the town forget about the railroad that passes thru this same neighborhood 2x daily?). But I would like to stress the safety of the townspeople when reviewing this project.

**COPY**

Put it somewhere else, not near anyone. Or better yet Crown Castle Towers,  
don't put it up at all.
